## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicants' arguments have been considered and are deemed to be persuasive.

The Horstmann reference teaches the addition of a cationic and an anionic substance to the skin-facing electrode surfaces, which would provide charged electrodes, however, those electrodes are not polymer electrodes, rather, the electrodes of the galvanic cells (battery elements 3 and 4) are polymer electrodes. The addition of the cationic and anionic substances to the skin electrodes would not appear to affect the ionization of the galvanic cell electrodes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
